CORAVIN™

The Coravin™ system is a unique wine preservation system. It allows us to pour wines from our best bottles, and keep it as fresh as the first pour, glass after glass. The Pivot+ Wine by the glass system lets you savor your wine on your terms. By replacing the bottle's closure with a specially designed stopper, Pivot+ allows you to pour as much or as little as you like while injecting Argon gas to shield the remaining wine from oxidation. Your wine stays fresh and flavourful for up to 4 weeks, so every glass tastes just as vibrant as the first. Wines dispensed using the Coravin™ system are indicated by a small Coravin™ logo.

Boscato Fine Wines - Producer Spotlight

****Exclusive to Braza Churrascaria***

The Boscato Fine Wines were founded by two brothers, descendent of Italian immigrants, Clovis Boscato (Enologist) and Valmor Boscato (Viticulturist). Their mission was and still is to produce wines of excellence that provide satisfaction, good health and a unique pleasure to the most demanding palates.

A LITTLE STORY...

After many years of experience working in wineries, dedication and passion for the art of winemaking, the two brothers Clovis and Valmor Boscato established their own winery in 1985 in the city of 'Nova Padua' in the northern mountain ranges of the 'Rio Grande do Sul' state in Brazil. It is an area of slopes high above the upper valley of the 'Antas River', with elevation ranges of up to 800m.

The Boscato Wines comes from the 'forces of nature, revealing the true soul of the land', Clovis says. Its greatness is a result of factors such as climate, type of soil, cultural treatments and topography, where the vines are planted.

Besides all these favourable factors, the vineyards undergo rigorous care, using a vertical trellising system, weather station, automatic drip irrigation and limited production of grapes per vine, which all together contributes to the achievement of high-quality grapes. All grapes are manually harvested.
